ENVIROSET 2100

Two Pack Water Based Epoxy

Technical Data Sheet Number 190

Technical Data Sheet Numbe						
PRODUCT	A & I Coatings ENVIROSET 2100 is a two-pack water borne epoxy coating with excellent					
DESCRIPTION			It is a self-priming and environmentally friendly			
	coating system which is ideal as a floor coating, due to its excellent adhesion and					
	chemical resistance. It can be tinted to an unlimited colour range.					
USES & BENEFITS	Concrete floors, walls and machinery in areas such as:					
	Factories and warehouses					
	Food and beverage industry					
	Hospitals, shopping centres, schools and laboratories					
	Chemical industry					
	Retaining walls					
	Seamless flooring					
	Waterproofing concrete slabs before floor overlay					
	Benefits		Limitations and Notes			
	1. Can be easily		1. Amine bloom may occur if humidity is above			
	brushed or rolled.		80%. Use ventilation to lower humidity if above			
	2. Excellent surface		80% or likely to be above 80% over curing period.			
	hardness and	vater 2	Minimum surface temperature should be at least			
	resistance	2.	3° C above dew point.			
	3. May be appli	3.				
	down to 8°C.	5.	without loss of film integrity. Can be over coated			
			with Envirothane topcoats for UV resistance			
PHYSICAL PROPERTIES	Vehicle Type	Ероху				
	Hardener	Polyamide				
	Pigmentation	Titanium dioxide or other				
	Mixing Ratio					
	Pot Life	1:1 (Pack A: Pack B) by Volume 1 hour@ 25ºC				
	Finish	Semigloss				
	Theoretical					
	Coverage	6 - 10m²/litre @ 40 to 60μm DFT (100 - 170 μm WFT) per coat				
	Volume Solids					
	Recommended DFT	38% by Volume				
	Usual No. of Coats	Typically, 40 - 60µm DFT per coat dependant on application				
		2 – 3 coats Not normally on concrete. Contact A & I Coatings for use on ot				
			in concrete. Contact A & i Coatings for use on other			
	Substrat					
		Light Grey AS 2700 N35 or other colour on request				
	Product Weight VOC Content	Approx. 1.12Kg/Litre dependant on colour				
		<27 grams/Litre Very good. NB. Black, dark, and strong colours will benefit with				
ENGINEERING DATA			a thin coat of E2000 Clear or E8474 Clear to			
	Bacterial Resistance	maximize mar resistance Very Good				
	Chemical Resistance	,				
	Salt Spray	Technical Team for specific requirements				
	Salt Spray	Very Good				
	Resistance	Evention to prove the second second for evening				
	Durability	Excellent for indoor application, topcoat needed for exterior				
	Dry Heat Resistance	120 ºC				
	Solvent Resistance	Excellent				

CURING DATA				5 11 0			
	Substrate Temp.(2C) Touch Dry	Light traffic	Full Cure	Recoat Min		
	10°C	6 - 8 Hrs	48 Hrs	7 Days	7 hrs		
	25 ºC	3 – 5 Hrs	24 Hrs	7 Days	4 hrs		
	Note	Abrade if recoating after 7 days					
APPLICATION DATA	Mixing	Power stir Pack A then blend Pack A with Pack B and power stir thoroughly for at least 2 minutes before thinning. Thin 1st coat up to 40% with clean water. The first coat can normally be walked on after 3 - 5 hours and the second coat applied. A third coat if required can then be applied next morning. The floor would then be ready to take light to medium traffic the following morning.					
	Application	Airless spray (rec tip range = 15 – 19Thou), roller or brush.					
	Thinning	Water. N.B. Always stir Part A & B together well, before adding water.					
	Cleaning	Use water, mild detergent, or methylated spirits.					
SURFACE PREPARATION	General	All surfaces to be structurally sound and free of contamination, particularly salt deposits. Loose or flaking paint must be removed by abrasive blast cleaning, power tool cleaning or sanding. Oil, grease, dirt etc must be removed with detergent and water blasting in accordance with AS 1627.1.					
	Concrete	Allow new concrete surfaces to cure for a minimum of 28 days before painting. Surface to be painted should be free from oil, grease etc in accordance with SSPS – SP1. To get uniform surface profile, use shot blasting, diamond grinding or acid etch. (Note: Acid etching is not recommended if excessive form oil is present in the concrete).					
	Aluminium, galvanised steel & Zincalume	Remove oil and degrease with mild detergent or with solvent to AS 1627.1. Slightly roughen the surface by sanding or light whip blasting with a non-metallic abrasive. Apply suitable primer according to specification.					
	Existing painted surfaces	All surfaces should be free from oil, grease and other contaminates, and loose and unsound paint. The existing coating must be thoroughly abraded and adhesion of E2100 to the existing coating checked prior to commencing the project.					
WORK STOPPAGES	General	Do not allow material to remain in hoses, gun or spray equipment. Once units of paint have been mixed, they should not be resealed and it is advised that after prolonged stoppages work recommences with freshly mixed units.					
	Clean Up	Clean all equipment after use with A & I Coatings recommended cleaner. Frequency of cleaning will depend upon amount sprayed, temperature and elapsed time (including delays).					
PACKING & STORAGE	Packing	Available in 4L or 20L Packs. For availability of other sizes, contact A&I					
	Storage	12 months if stored in sealed containers away from heat and moisture. Subject to re-inspection thereafter.					
HEALTH & SAFETY	All applicable statutory regulations must be observed in the application of this product. Users must first read the Material Safety Data Sheet for Enviroset 2100. Users should familiarize themselves with all the safety aspects of the product. Please ensure the current Technical Data Sheet is consulted prior to specification or application of A & I Coatings products. If the surface intended to be painted differs from the specification, please consult the A & I Coatings Technical team on 1800 819 585.						

All surplus materials and empty containers should be disposed of in accordance with appropriate regional regulations/legislation. Note: The figures quoted for pot life and drying/curing times are not definitive. They are dependent on onsite conditions, such as volume of material mixed, ambient and substrate temperatures, weather and ventilation. DISCLAIMER Since the use and application of this product is beyond our control, we cannot be held responsible for product field performance. The information presented above is the result of our considerable experience with this product but is not to be construed as a performance warranty. For additional information, phone our Customer Service Centre on 1800 819 585, or e-mail helpdesk@aicoatings.com Visit our website for more products: www.aicoatings.com
